

PALLETS

“Certified by European Pallet Association Germany”

About

RADHA AGRO INDUSTRIES

Radha Agro Industries was started with the aim of providing manufacturing pallets to make the supply chain processes easy and smooth. We are glad to share that today after having experience of more than three decades, we are serving national and international companies who deal with Pharmaceuticals, Food Items, exporters of Auto Parts, Tractor Parts, Fasteners and Hand Tools materials. The list of our customers can go on as we are satisfying every need of all types of logistics and firms.

With the hard work and skills of our talented team members, our name now comes in the **Top Pallets Manufacturers in INDIA** who are offering the **Euro, Industrial, Collar, Heat Treated pallets** at your one requirement.

We are the first and only exporter of wooden pallets & we are the first company in north india who have EPAL pallets licence from european pallets association, Germany.

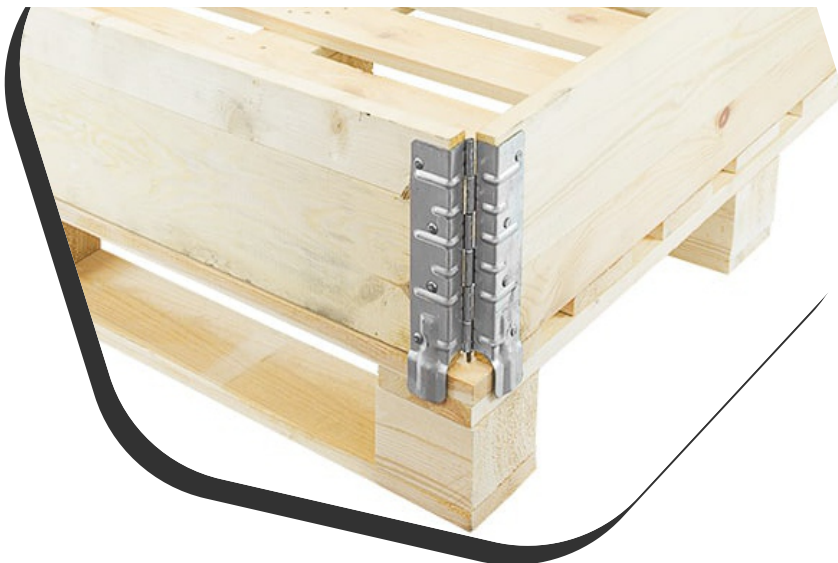

Meet The Team

The team is successful because of the leadership of Mr. Nishant Sama who has not left any stone unturned and also pushed all the team members to manufacture excellent quality pallets and boxes.

He has won the hearts of several people and knows well how to lead them in an effective way to accomplish goals.

All the members of Radha Agro Industries thank our valuable clients who have helped us to climb the ladder of success in such a short period. We'd be delighted to hear your ideas since we believe in providing the highest quality products such as ISPM-15 Pallet, Heat Treated Pallets, and Wooden Pallets.

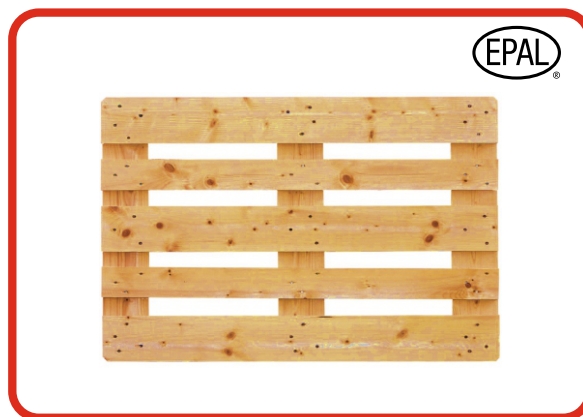

Types of Pallets

The EPAL Euro Pallets (1200x800x144)

1. Isometric view

4. Top view

2. 1200-mm side

5. Bottom view

3. 800-mm side

6. Collar Pallets 1200 x 800 x 200 - mm

A WIDE RANGE OF PALLET COLLARS

We produce wooden pallet collars according to standard specifications as well as offer custom solutions for our clients.

VARIETY OF SIZES

We produce wooden pallet collars of both standard sizes – 100, 200, 300, and 400 mm high – as well as non-standard ones, including those created in accordance with the individual requirements of customers.

Length: from 300 to 3500 mm

Height: from 100 to 400 mm

PRODUCTION ACCURACY

The accuracy and precision of fastening the hinge on the board is a key element in pallet collars. For 100% quality management of this process, we launched our own production of hinges using two OMERA presses. In addition, more than five assembly lines, built according to a self-designed project, are installed at the production site.

PRODUCT BRANDING

At the request of the client, we carry out painting of the collars and branding, that is, the application of symbols (logos). This facilitates the identification, accounting and distribution of products in the warehouse as well as contributes to the recognition of the client's company in the market.

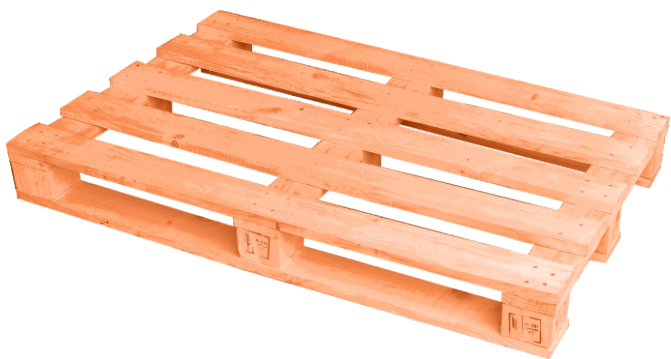

Painting the collars and hinges upon the customer's request

MORE OPTIONS FOR ACCESSORIES

Pursuing the goal to improve the functionality of the packaging and the reliability of the cargo during its transportation and storage, we have developed a line of accessories. Our clients can take advantage of optimal solutions to improve the effectiveness and the safety of the storage and movement of goods.

PACK with DAUBERT VCI®

DAUBERT VCI® TECHNOLOGY

VCI technology is based on the combined principles of polarity and volatility. When metals are in the vicinity of VCI products, the chemicals volatilize in the 'enclosed' environment and form a protective molecular layer, which prevents moisture, salt, dirt, oxygen and other materials from depositing on the metals and inhibits corrosion. The main benefits of the VCI Technology lie in its ability to self-apply and dissipate.

Note
